PROFILE

Software Developer specializing in Python and Django with a passion for integrating AI into web experiences. Experienced in the full development lifecycle, from designing robust SQL databases to building efficient RESTful APIs. I combine technical proficiency in modern web frameworks with hands-on experience in LLMs and machine learning, consistently delivering responsive, user-focused applications

EDUCATION

Master of Computer Applications (MCA)

University of Kerala | 2024 – 2026 (Expected)

Relevant Coursework: Data Structures & Algorithms, Database Management, Web Architecture.

Bachelor of Computer Science

Kerala University | 2021 – 2024

TECHNICAL SKILLS

- Programming Languages: Python, JavaScript, SQL (Basic), PHP (Basic), HTML5, CSS3, NodeJs
 - Frameworks & Technologies: Django, Bootstrap, MVC Architecture, RESTful APIs, Machine Learning
 - Databases: MySQL, MongoDB, SQLite, Oracle SQL, PL/SQL, RDBMS
 - Tools & Platforms: Git, GitHub, Visual Studio Code (VS Code)
 - Software Development Concepts: SDLC, OOPS, Unit Testing, Responsive Web Design
 - Emerging Technologies: Artificial Intelligence, Large Language Models (LLM), RAG
 - Soft Skills: Communication, Team Collaboration, Problem Solving, Adaptability, Time Management
-

EXPERIENCE

Internship – AI & Machine Learning | Srishti Innovative | 2025

- Breast Cancer Detection System: Developed a diagnostic model using Machine Learning.
 - Implemented data preprocessing and cleaning pipelines, improving model accuracy by 98% through effective feature engineering.
-

PROJECTS

• Farmie -Farming Assistance Web Service

Technologies used: PHP, HTML,CSS, JavaScript, Postgresql.

- Developed a full-stack agriculture management system using to streamline farm operations.
- Implemented an Admin Panel to manage records and monitor user activities, improving data accessibility for administrators.

• LearnLoop : Career Assistance Website | [Live Demo](#)

Technologies used: Python, Django, SQLite (Database), HTML5, CSS3, Bootstrap, Machine Learning.

- Built a career-finding platform using Django and Machine Learning to provide personalized career paths.
- A dynamic questionnaire system that analyzes user input to deliver tailored skill development suggestions.

• Multi-College Personalised Management Platform

Technologies used: Python , Django, SQLite, HTML5, CSS3 , Tailwind

- Developed an AI-powered cloud-based education management platform with role-based portals, attendance tracking, scheduling, and student management features.
 - Integrated chatbot support, and automated timetable generation to improve academic efficiency.
-
