PROFILE

Aspiring Full Stack Developer with hands-on experience in HTML, CSS, JavaScript, React.js (Basic), Python, and Django. Passionate about building responsive web applications and eager to strengthen my frontend development skills using React.js. Quick learner with strong problem-solving skills and experience working with Git and collaborative development.

SKILLS

- Frontend : HTML5, JavaScript, React.js (Basic), Bootstrap
 - Backend : Python, Django, REST APIs,
 - Databases: MySQL, SQLite, Oracle SQL, PL/SQL, RDBMS
 - Tools & Version Control: Git, GitHub, Visual Studio Code (VS Code)
 - Software Development: Responsive Web Design, SDLC, OOPS, Unit Testing
 - Emerging Technologies: Artificial Intelligence, Machine Learning , RAG
 - Soft Skills: Communication, Team Collaboration, Problem Solving, Adaptability, Time Management
-

EXPERIENCE

Intern – AI & Machine Learning | Srishti Innovative | 2025

Developed a breast cancer diagnostic model utilizing various algorithms, achieving a higher classification accuracy on validation datasets. Implemented data preprocessing and cleaning pipelines, improving model accuracy by 98% through effective feature engineering.

PROJECTS

- **Online Crime Reporting**

Technologies used: HTML5, CSS3, JavaScript, PHP

Developed an online crime reporting platform that enables users to report incidents directly to law enforcement through a user-friendly interface.

- **Learn Loop - Career Assistance Website | [Live Demo](#)**

Technologies used: Python, Django, SQLite (Database), HTML5, CSS3, JavaScript, Bootstrap, Machine Learning.

Designed a career guidance and career-finding platform utilizing machine learning to provide personalized career recommendations. By analyzing user responses to detailed questionnaires, the platform delivers tailored insights, skill development suggestions, and growth opportunities.

- **Digital Memory Forensics using RAG & Vector Database**

Technologies used : Python, Django, SQLite (Database), HTML5, CSS3, JavaScript, Tailwind, Ollama , RAG, LLM

Developed an AI-powered forensic analysis platform using Python, Django, RAG, and vector databases to perform semantic search, anomaly detection, and timeline reconstruction from unstructured digital evidence.

CERTIFICATIONS

- Software Development in Python - IT-ITeS Sector Skills Council (NASSCOM), 2024
 - SAP FICO S/4HANA from - Udemy, 2025
 - Data Analyst Bootcamp Certificate - Udemy, 2025
-

EDUCATION

Master of Computer Applications (MCA) | CHMM College for advanced studies | **2024 – 2026**

Bachelor of Computer Science | University Institute of Technology , Pirappancode | **2021 – 2024**

CGPA: 8.1 / 10

Higher Secondary Education (Class XII) | Raja Ravi Varma Girls Higher Secondary School | **2021**

Result: 92%

Stream: Computer Science
